CUBICLE CURTAIN TRACK

INTRODUCING OMNITRACK AND CLEANITRACK CUBICLE CURTAIN TRACK SYSTEM FROM CAPRICORN

The cubicle track systems from Capricorn have been developed with versatility, hygiene and durability in mind.

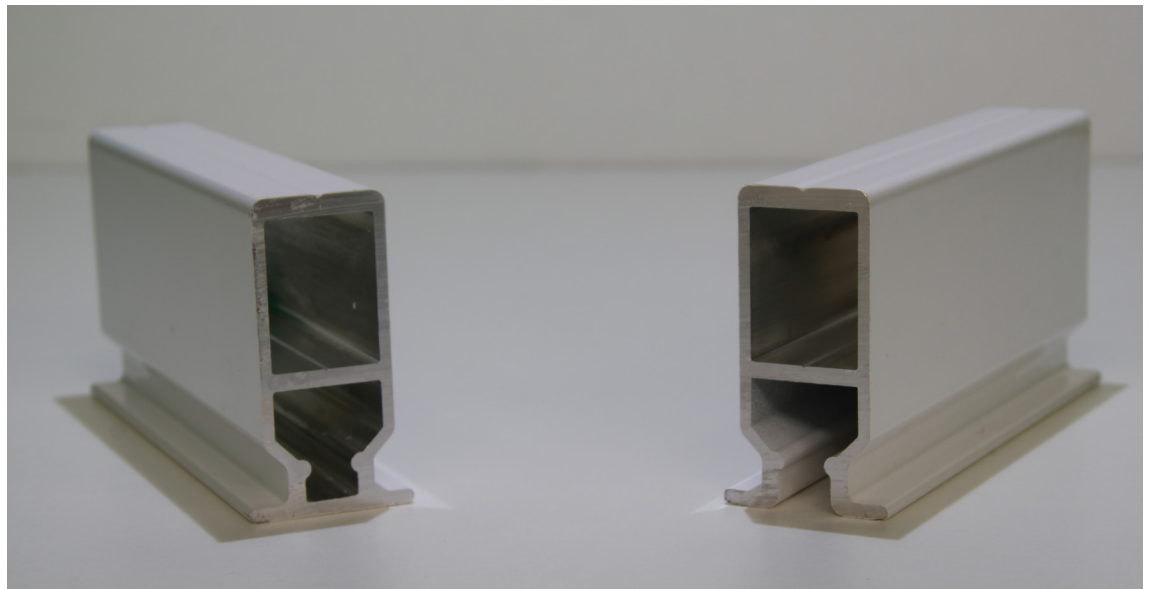

The concept of the curtain tracks are for them to be the only track solution you will ever need by providing the operator strength and versatility regardless of the application.

The track systems feature no grooves where dust or dirt may get trapped and are therefore ideal to be used in hygiene sensitive environments such as hospitals and health facilities.

The innovative design features leave no gaps between the track and the wall to ensure that patient privacy is retained at all times.

Tracks are supplied up to 6m long though where greater widths are required, tracks can be made to any size and shape.

Omnitrack and Cleanitrack are manufactured to the highest standards in line with NHS and HTM 66 requirements using the highest quality materials, such as stainless steel and aluminium with corrosion-resistant finishes.

Omnitrack®

CUBICLE CURTAIN TRACK

FEATURES AND BENEFITS

- ↓ Totally versatile- the unique dual-track system accepts disposable curtains with both internal and external gliders.
- ↓ The only track on the market with no channels, so no dust traps and no rubber capping required.
- ↓ Tracks can be made to any size and shape to accommodate any layout requirement.

Cleanitrack[®]

CUBICLE CURTAIN TRACK

FEATURES AND BENEFITS

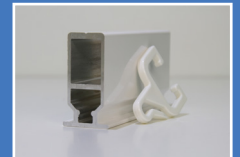

-  The channel-free design eliminates build-up of bacteria, making Cleanitrack the only track on the market with no channels
-  No dust traps and no rubber capping required.
-  Tracks can be made to any size and shape to accommodate any layout requirement.

TRACK SPECIFICATION

Cleanitrack cubicle track system by Capricorn Contracts, +44 (0)121 772 5370. Aluminium track with white powder-coated finish and including all necessary fittings. Each track will be fitted with a PushClick[®] curtain removal point.

CURTAIN HOOK COMPATIBILITY

FAST-FIT CURTAIN HOOKS

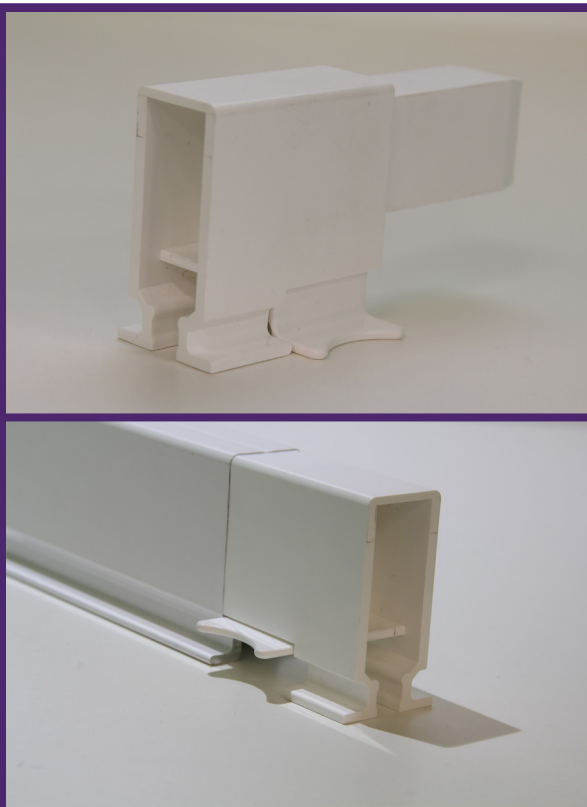

OPTIONS

- Fast-Fit curtain hooks
- Wall fixing kit
- Ceiling support kits are available in 500mm straight suspension, 1000mm straight suspension and direct ceiling fix
- Tracks can be made in any RAL colour

PushClick[®]

CURTAIN REMOVAL POINT

The Capricorn cubicle track systems are fitted with our inventive curtain removal point that enables the curtain hooks to run smoothly and uninterrupted across the track. When curtains need replacing, the removal point is pushed upwards to allow for the curtains to be removed quickly and without the need to remove any parts from the track.

ANTI - LIGATURE

The Omnitrack and Cleanitrack systems can be fitted with the Kestrel Magnetic Suspension System for anti-ligature use.

This is an NHS requirement in mental health areas where patients may be at risk of self-harm.

For more information on our anti-ligature solutions, please contact us at info@capricorncontracts.com.
